

Transas Marine

THE WORLD'S NUMBER ONE IN ECDIS

A guide to ECDIS and
additional services

The pioneer of modern navigation

To be the number one in ECDIS, the past is just as significant as the future. At Transas our history speaks for itself. From the very first Electronic Chart System in 1990 to the latest version of ECDIS, Transas has led the way in electronic navigation.

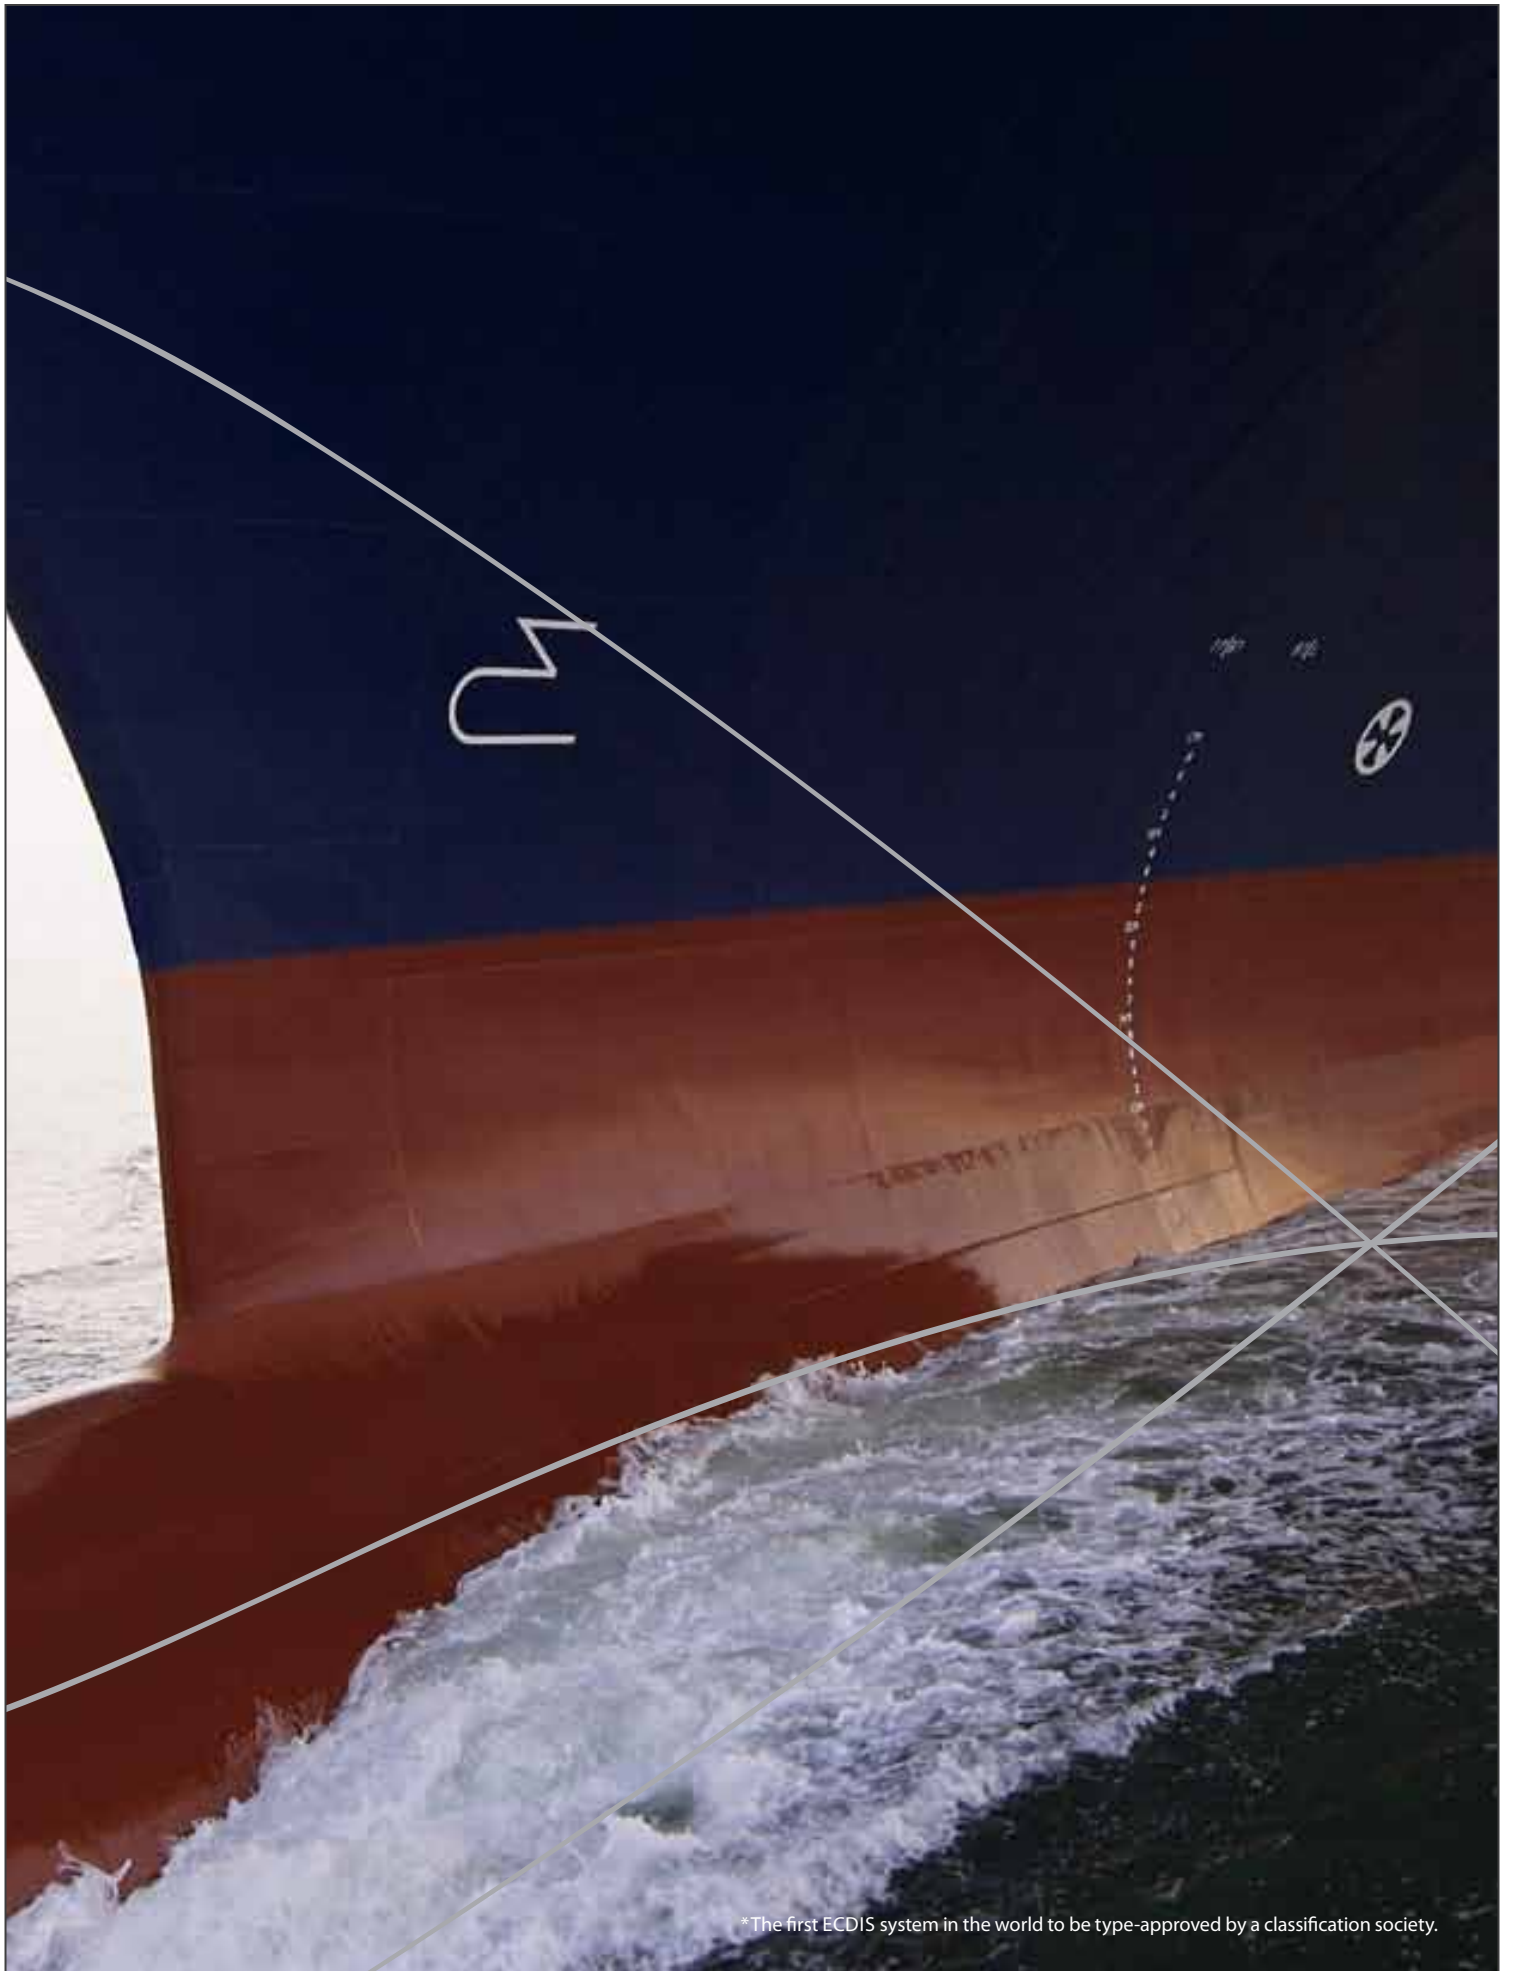

When you choose Transas you tap into an ocean of ECDIS knowledge. A deep understanding of navigation that extends beyond the product itself and includes a vast array of additional services we've made available to you. By choosing Transas you benefit from a global network with over 20 years of navigation experience.

It's in every single component, in every single system.

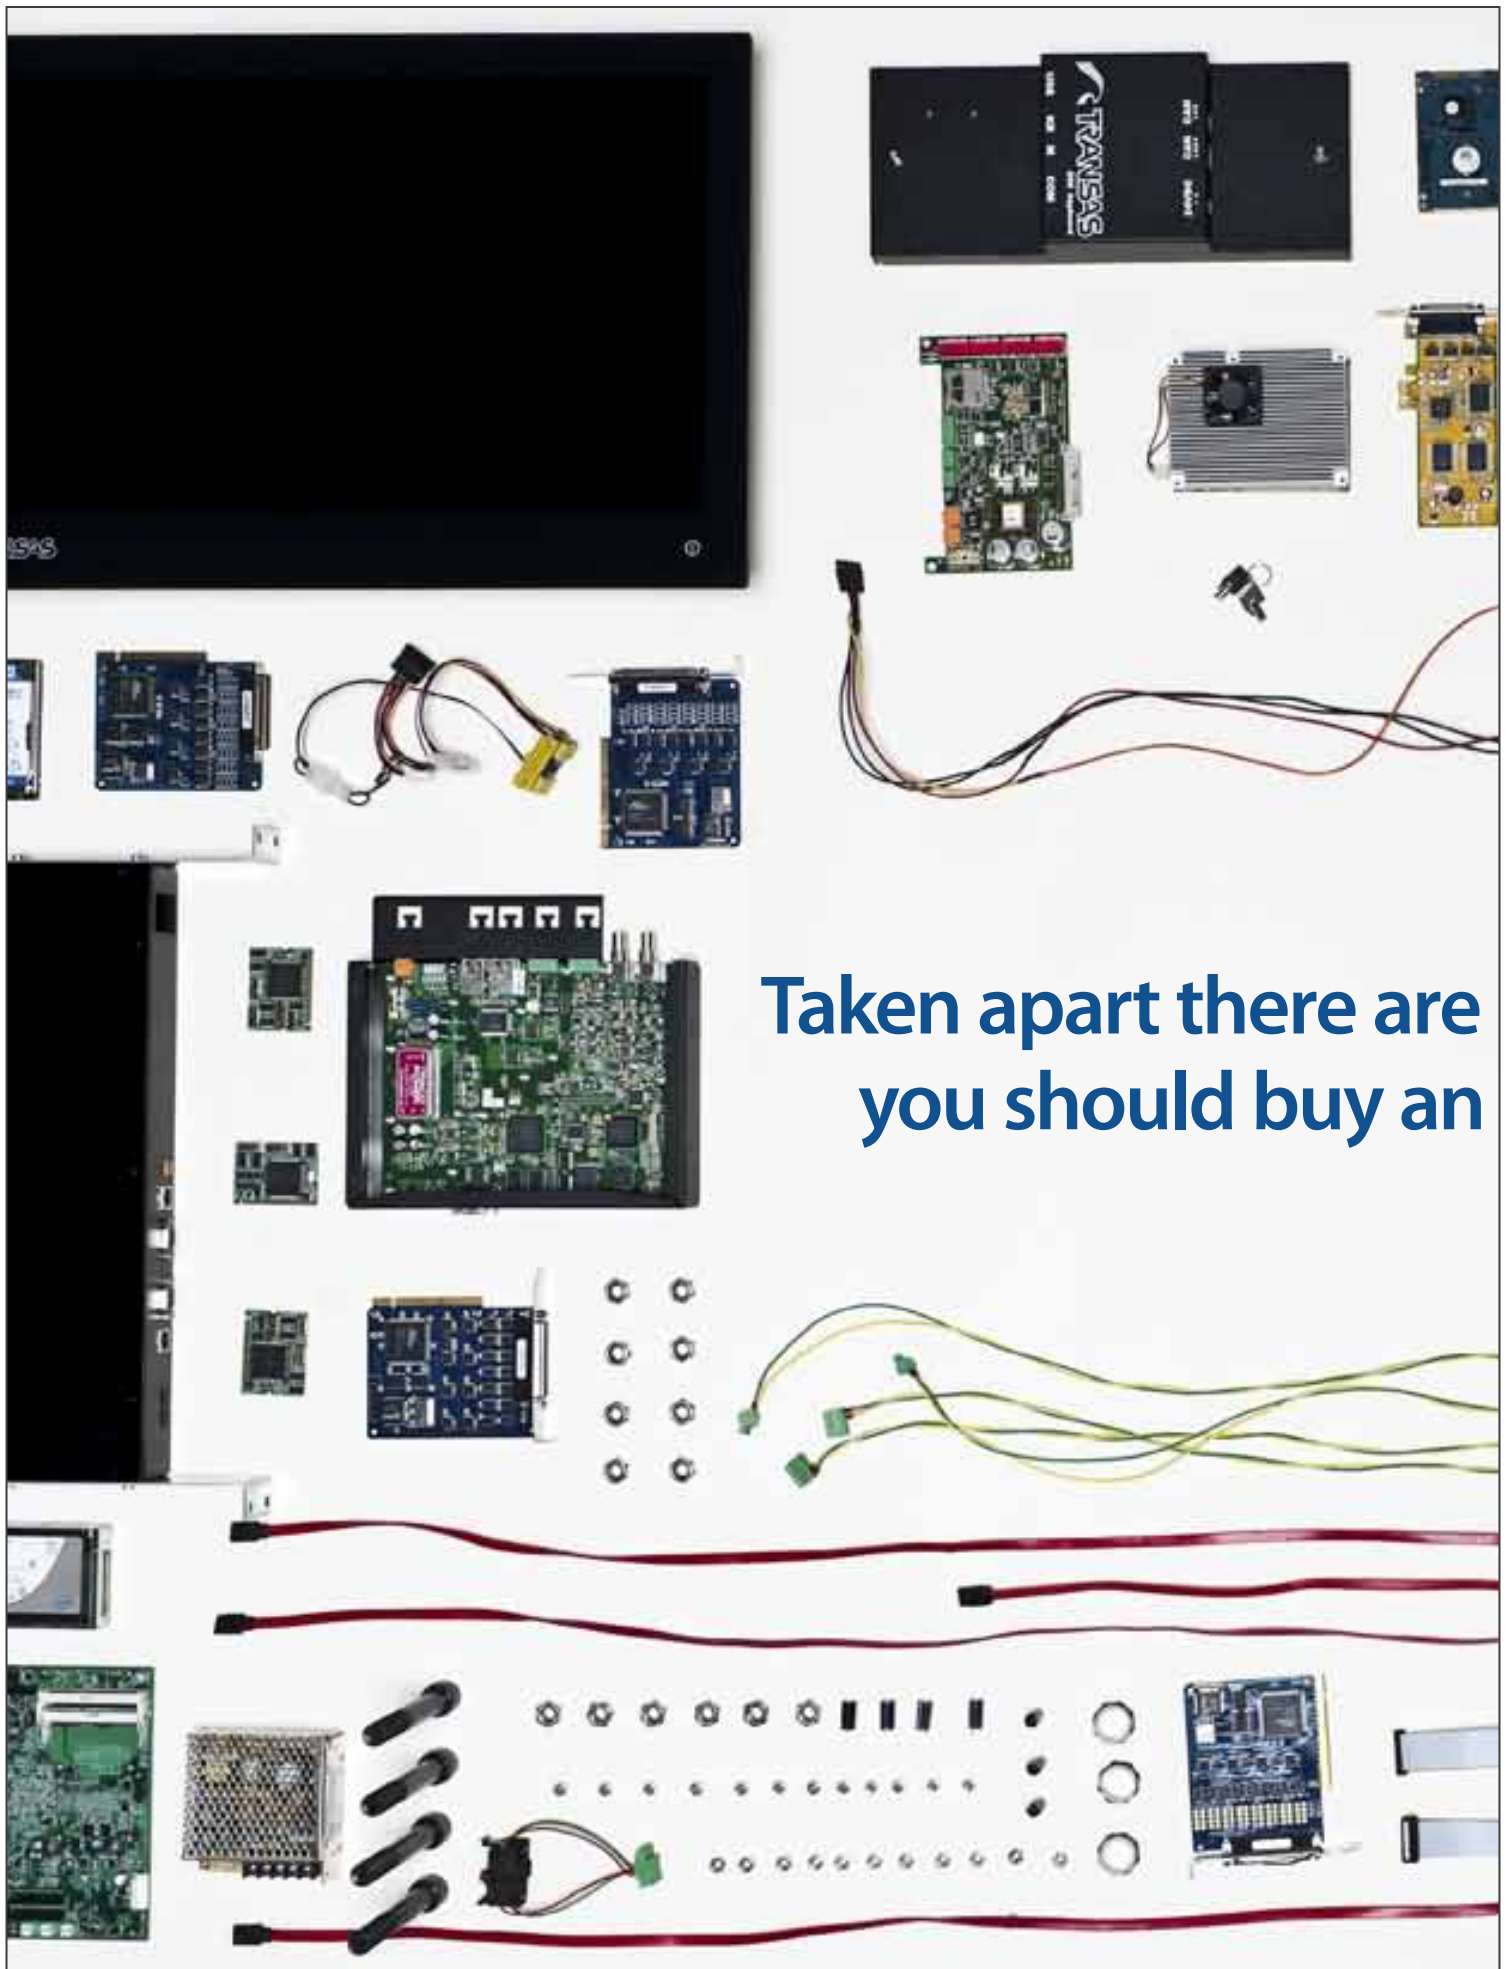

A timeline of Transas ECDIS products is displayed, with each year and product name connected to a red dot on a dark red curved line. The timeline starts at 1990 and ends at 2011, showing the evolution of the company's electronic chart display and information system (ECDIS) technology over two decades.

- 1990 – Transas Navi-Master Chart System is born
- 1992 – Navi-Sailor 500 series launched
- 1999 – Navi-Sailor 2400 ECDIS type approved by BSH in Germany *
- 2002 – Navi-Sailor 3000 launched
- 2005 – NS3000i (HTIBS) launched in partnership with Hyundai
- 2008 – All-new Navi-Sailor 4000 launched
- 2009 – Latest Navi-Sailor 4000 MFD
- 2011 – New ECDIS Concept

*The first ECDIS system in the world to be type-approved by a classification society.

Taken apart there are
you should buy an

[illegible]

So we've put together four simple packages ...

Standard. Standard+. Premium. Premium+. Each system includes a carefully selected range of standard features. There is also an extensive range of additional hardware and software options available.*

So whether you are just beginning your ECDIS journey or looking for the ultimate level of information at your fingertips, there is something for every ECDIS user.

*Contact your local Transas dealer for more information.

Standard⁺

With the Standard+ package you get everything in the Standard ECDIS along with the following additional planning and information functions:

- › AIS, ARPA and Target Management
- › Additional Sensors
- › Additional Route Planning Functions
- › Additional Chart Formats
- › Tides & Currents
- › Maps (User Charts)
- › Navtex Interface

Premium

For those that want ECDIS to do more than fulfill the regulations. The Premium range utilizes the powerful RS6 marine computer with the latest Navi-Sailor 4000 ECDIS MFD software and Marine LED Display. A whole host of additional standard features include:

- › Transas ES6 Trackball and Keyboard
- › User Configurations
- › Dual Chart Panel
- › Left Side Information Panel
- › Docking Mode
- › Quick Distance Calculator
- › AIS MKD Functionality

One last word about putting things together

In our purpose-built premises we manufacture your ECDIS to the highest standards. The Transas ECDIS assembly process is certified by Det Norske Veritas (DNV) according to Marine equipment directive 96/98/EC Module D/E.

Transas ECDIS equipment is compliant to environmental EU Directive Restriction of Hazardous Substances 2002/95/EC (RoHS) and Waste Electrical and Electronic Equipment 2002/96/EC (WEEE).

Transas is an ISO9001: 2008 certified company.

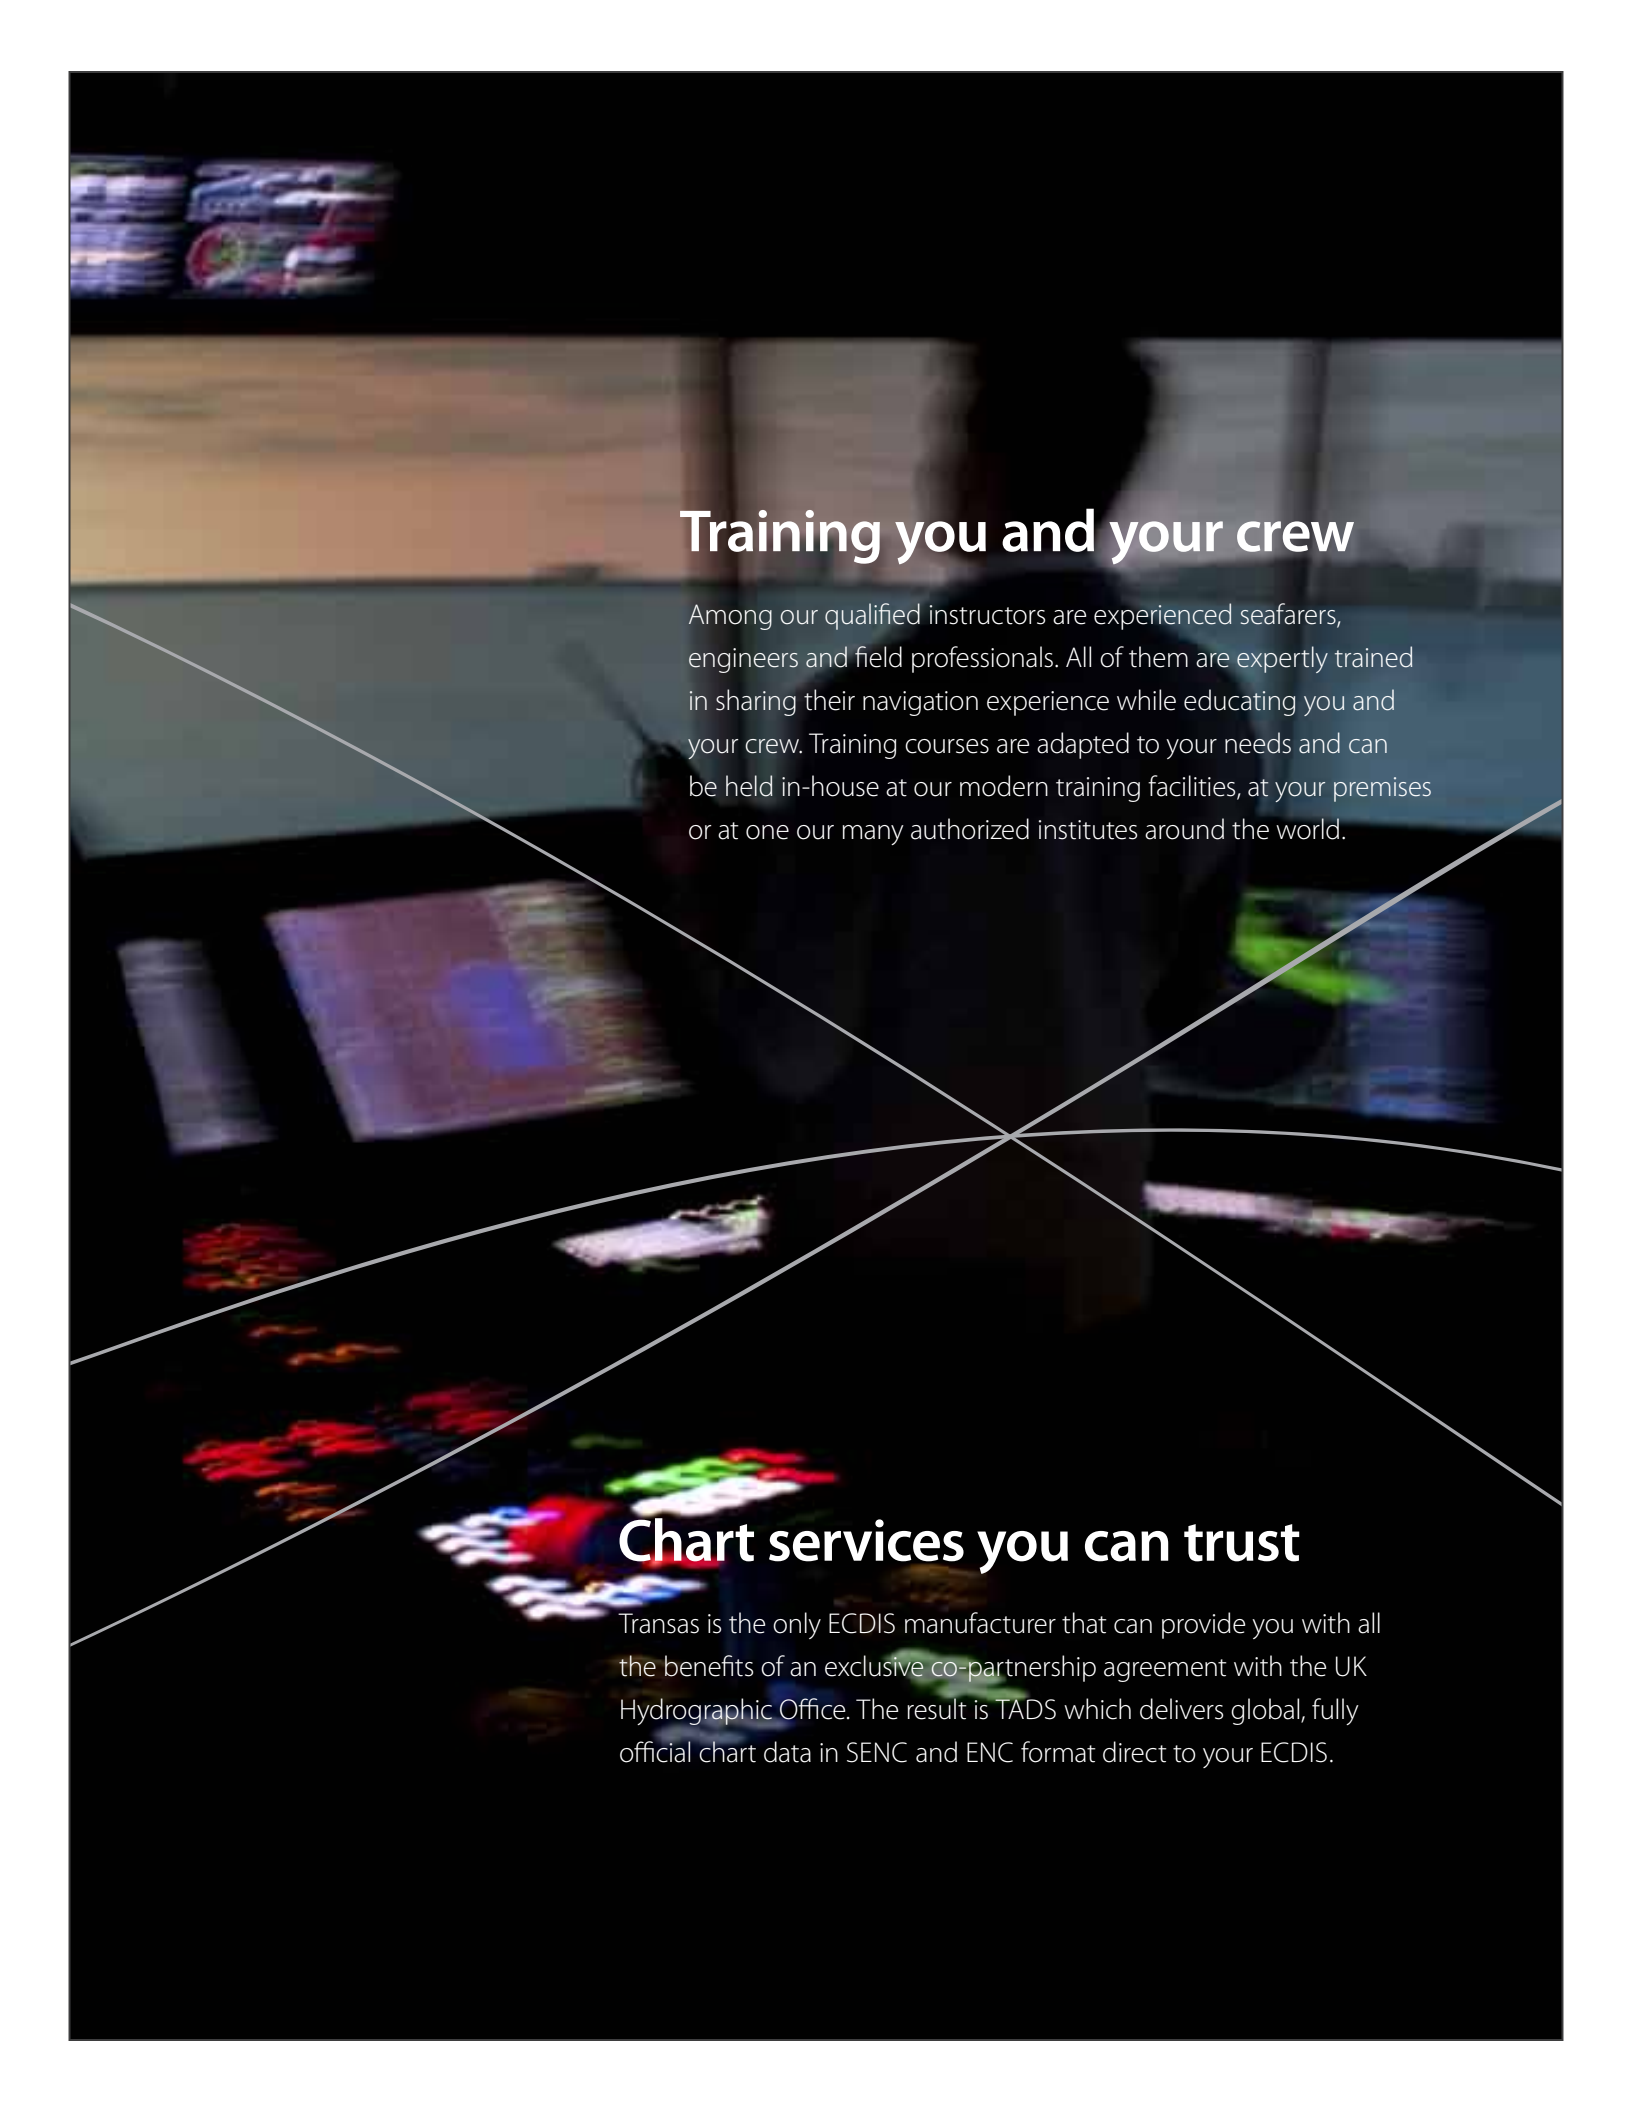

A person is seen from behind, working at a computer. The computer has multiple monitors. The top monitor shows a house icon and some data. The middle monitor shows a large map or chart. The bottom monitor shows a list of data with orange and yellow highlights. The person is in a dark room, and the light from the monitors illuminates their face and the desk.

Service and support you expect from a world leader

The world's leading ECDIS would not be complete without absolute peace of mind. And that comes from knowing that our worldwide service network guarantees that you're never far from assistance. You're supported 24/7 and will always experience our Anything, Anywhere, Anytime Attitude ... whatever the weather.

Installation on your terms

The installation process can be complex. But our international team of technicians makes it easier for you. A pre-installation survey ensures that all the materials and equipment are correctly quantified and that work is carried out to the highest standards.

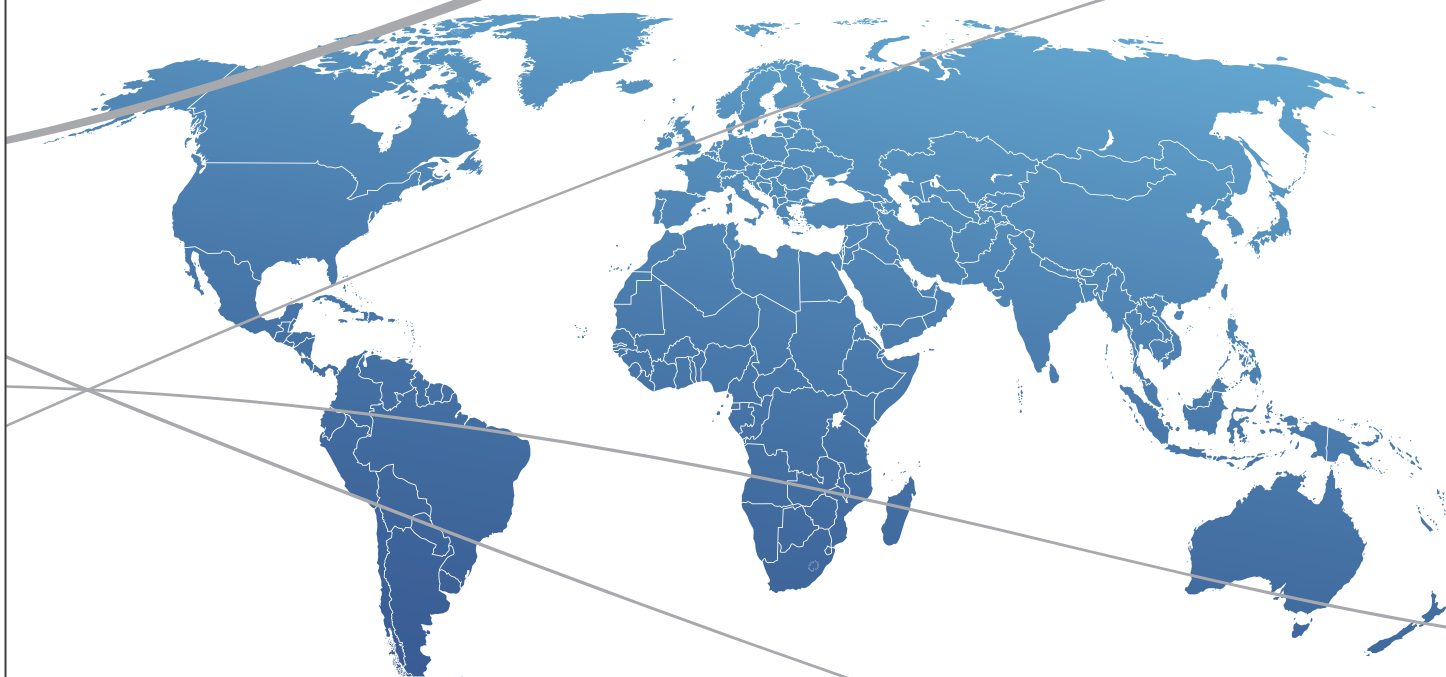

Training you and your crew

Among our qualified instructors are experienced seafarers, engineers and field professionals. All of them are expertly trained in sharing their navigation experience while educating you and your crew. Training courses are adapted to your needs and can be held in-house at our modern training facilities, at your premises or at one of our many authorized institutes around the world.

Chart services you can trust

Transas is the only ECDIS manufacturer that can provide you with all the benefits of an exclusive co-partnership agreement with the UK Hydrographic Office. The result is TADS which delivers global, fully official chart data in SENC and ENC format direct to your ECDIS.
